

AI Impact Assessment

Overview

By analyzing the maturity of your AI program across critical technical, organizational, and cultural factors, we provide you with a clear, strategic roadmap to guide your cybersecurity program. Our assessment helps you understand your AI-related risks and build the right strategy to overcome them.

What You'll Gain

- A tailored assessment mapped against industry-standard frameworks and AI readiness models
- A multi-dimensional view of your current maturity around AI
- Strategic and tactical recommendations aligned to business objectives
- A visually-driven roadmap that helps executives and technical leaders prioritize and act
- The confidence that your organization is using AI safely, effectively, and strategically

Key Benefits

Why K logix?

With years of in-depth experience, K logix delivers white glove assessments tailored to each customer's specific requirements. Our approach empowers organizations to identify, act, and improve, not only securing today's environment but also preparing for the rapid technological shifts ahead.
